

Ebin Reji

UI/UX Engineer & Front-End Developer

+91 95263 25296 | ebin05reji@gmail.com | LinkedIn | Portfolio | GitHub
Mavelikara, Alappuzha, Kerala – 690505

PROFILE

Dynamic and user-centric UI/UX Engineer and Front-End Developer with a strong foundation in Computer Science and Engineering. Proven track record of bridging the gap between design and technical implementation by conceptualizing high-fidelity prototypes in Figma and engineering them into responsive web applications using React.js, Tailwind CSS, and Python. Adept at leveraging modern AI-assisted development workflows to accelerate rapid prototyping and full-lifecycle system implementation. Highly active community leader recognized for delivering robust UI architectures, driving cross-functional collaboration, and orchestrating technical workshops.

EXPERIENCE

MuLearn Foundation & The Purple Movement

UI/UX Core Team Member & UI/UX Developer

Dec 2025 – Present

Thiruvananthapuram, Kerala

Hybrid

- Spearhead user interface initiatives across global and regional scopes, mapping UX design systems and generating component assets using Figma.
- Collaborate within cross-functional teams to outline scalable interface aesthetics, directly resulting in highly optimized web engagement structures for community products.

IEEE EMBS Pune Chapter

Research & Engineering Intern

Mar 2026 – Present

Remote

- Formulate core visual and technical architectures for digital system projects, actively synthesizing full-lifecycle product development to fulfill research publishing benchmarks.
- Document software requirements, test rapid user prototypes, and resolve complex application design bottlenecks through logic-driven engineering practices.

MuLearn SBC – Campus Chapter

Technical Associate & Former UI/UX Interest Group Lead

Aug 2025 – Present

Sree Buddha College of Engineering, Pattoor

- Manage technical development pipelines at the campus chapter level, driving student upskilling and mentoring peers in design technologies.
- Organized and led multiple UI/UX and software prototyping bootcamps, amplifying active platform engagement and elevating campus technical literacy.
- Achieved an elite community milestone by securing a personal μ Learn Karma Score of 30,000+ points through continuous skill-building challenges.

IEEE SB SBCE

Membership Development Coordinator & Program Coordinator

Jun 2025 – Present

Sree Buddha College of Engineering

- Supervise student outreach operations, oversee membership lifecycle infrastructure, and map multi-tier technical event programs across the engineering department.
- Facilitate structured project stand-ups and manage cross-functional event committees to optimize operational efficiency.

TinkerHub SBCE

Tech Team UI Designer

Sep 2025 – Jan 2026

Sree Buddha College of Engineering, Pattoor

- Developed high-fidelity prototypes and digital assets within the open-source community tech squad to facilitate rapid development loops.
- Translated conceptual feature scripts into visually engaging wireframes to ensure seamless end-user workflows.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering

2023 – 2027 (Expected)

Sree Buddha College of Engineering, Pattoor – APJ Abdul Kalam Technological University

- Pursuing a comprehensive undergraduate engineering program with active leadership roles in IEEE SB and MuLearn campus ecosystems.
- Appointed Membership Development Coordinator for IEEE SB SBCE and Technical Associate at MuLearn SBC.

Higher Secondary Education – Computer Science Stream

2021 – 2023

Central Board of Secondary Education

- Acquired fundamental knowledge in computing architecture, logic foundations, and primary syntax rules.

TECHNICAL PROJECTS

DarkNetra – Hybrid Phishing Detection System & Telegram Bot | [View Project](#)

- Engineered a full-stack security web application that classifies and detects malicious links utilizing trained ML models and security API integrations; deployed a Python-based Telegram chatbot to maximize tool accessibility via real-time automated messaging.
- **Stack:** Python, Flask, Machine Learning Models, Telegram Bot API, Vercel

Crypto Chat – Real-Time Communication Platform | [View Project](#)

- Designed and implemented a responsive real-time messaging web app featuring multi-room communication, multimedia sharing, and Firebase-powered live data syncing, authentication, and messaging streams.
- **Stack:** React.js, Firebase, JavaScript, Tailwind CSS, HTML5/CSS3

Mileage Undo – AI-Driven Web Utility | [View Project](#)

- Conceptualized and engineered an interactive application that calculates vehicle mileage statistics while dynamically generating customized AI roasts analyzing user driving habits via LLM prompt pipelines.
- **Stack:** React.js, Tailwind CSS, AI APIs, JavaScript, Vite

Beyond Syllabus & The Purple Movement – UI/UX Web Architectures

- Designed end-to-end UX journeys and responsive layouts for an open-source educational student resource directory; created comprehensive Figma design systems and UI prototypes for The Purple Movement NGO website.
- **Stack:** Figma, User Interface Design, Rapid Prototyping

SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), React.js, Python, Flask, HTML5, CSS3, Tailwind CSS, Vite, REST APIs
- **Backend & Platforms:** Firebase, Git, GitHub, Vercel, Netlify, Telegram Bot API
- **Design Tools:** Figma, Wireframing, High-Fidelity Prototyping, Component-Driven Design, User Experience Design (UED), Notion
- **Competencies:** Rapid Prototyping, AI-Assisted Development, Cross-Functional Collaboration, Technical Leadership, Responsive Web Design
- **Certifications:** NPTEL Elite Grade – The Joy of Computing using Python (70%+)
