PROFILE

UI/UX Engineer, Front-End Developer, and technical community leader with a strong foundation in Computer Science and Engineering. Leads cross-functional design and engineering initiatives across multiple student tech organizations, translating Figma design systems into production-grade, responsive applications with React.js, Tailwind CSS, Next.js, and Python. Builds full-lifecycle products end-to-end – from architecture and UI systems to backend and desktop delivery with Node.js, Firebase, and Tauri – leveraging AI-assisted development workflows to accelerate execution. Award-winning builder: placed 3rd at BrainHack'26 for TalentPilot, a zero-cost, offline local-LLM desktop application. Recognized for driving teams, mentoring peers, and shipping robust, user-centric software under tight timelines.

EXPERIENCE

MuLearn Foundation & The Purple Movement

UI/UX Core Team Member & UI/UX Developer

Dec 2025 – Jun 2026

Thiruvananthapuram, Kerala

Hybrid

- Lead UI initiatives across global and regional community products, mapping scalable UX design systems and driving cross-functional design-to-engineering collaboration.

IEEE EMBS Pune Chapter

Research & Engineering Intern | [Certificate](#)

Mar 2026 – Jun 2026

Remote

- Owned visual and technical architecture for digital research projects, resolving design bottlenecks through logic-driven, full-lifecycle engineering practices.

MuLearn SBC – Campus Chapter

Technical Associate & Former UI/UX Interest Group Lead

Aug 2025 – Present

Sree Buddha College of Engineering, Pattoor

- Lead technical development pipelines and mentor peers campus-wide; organized multiple UI/UX and prototyping bootcamps that lifted engagement and technical literacy.
- Reached an elite μ Learn Karma Score of 30,000+ through sustained skill-building leadership.

IEEE SB SBCE

Membership Development Coordinator & Program Coordinator

Jun 2025 – Present

Sree Buddha College of Engineering

- Direct membership lifecycle operations and cross-functional event committees, coordinating multi-tier technical programs across the department.

TinkerHub SBCE

Tech Team UI Designer

Sep 2025 – Jan 2026

Sree Buddha College of Engineering, Pattoor

- Delivered high-fidelity prototypes for the open-source tech squad, translating feature concepts into polished, user-ready wireframes.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering 2023 – 2027 (Expected)
Sree Buddha College of Engineering, Pattoor – APJ Abdul Kalam Technological University

- Active leadership roles across IEEE SB and MuLearn campus ecosystems, including Membership Development Coordinator and Technical Associate.

Higher Secondary Education – Computer Science Stream 2021 – 2023
Central Board of Secondary Education

- Built foundational knowledge in computing architecture, logic, and primary programming syntax.

TECHNICAL PROJECTS

TalentPilot – Offline Resume Analysis Desktop App | 3rd Place, BrainHack'26 3 Aug 2026

- Built a fully offline desktop app, as part of team *Aimless* (SBCE), analyzing CVs using a locally-run LLM (Gemma) – zero API cost in development and use.
- Won **3rd Place** at BrainHack'26, hosted by College of Engineering Adoor (CEA), against teams including 1st – Anomaly (TKMIT) and 2nd – 404 Not Found (CEA).
- **Stack:** Tauri, Python, Gemma (Local LLM)

DarkNetra – Hybrid Phishing Detection System & Telegram Bot | [View Project](#)

- Built a full-stack security app classifying malicious links via trained ML models, with a Telegram bot for real-time accessibility.
- **Stack:** Python, Flask, ML Models, Telegram Bot API, Vercel

Crypto Chat – Real-Time Communication Platform | [View Project](#)

- Built a responsive real-time messaging app with multi-room chat and Firebase-powered live sync and auth.
- **Stack:** React.js, Firebase, Tailwind CSS, JavaScript

Mileage Undo – AI-Driven Web Utility | [View Project](#)

- Built an interactive mileage calculator that generates AI-driven roasts of driving habits via LLM prompt pipelines.
- **Stack:** React.js, Tailwind CSS, AI APIs, Vite

µLearn SBC – Official Campus Chapter Website | [View Project](#)

- Built the full UI and front-end architecture for the official campus chapter site, turning Figma systems into a polished production site.
- **Stack:** React.js, Vite, Tailwind CSS, Framer Motion

SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), React.js, Next.js, Node.js, Python, Flask, HTML5, CSS3, Tailwind CSS, Vite, REST APIs
- **Cross-Platform & Backend:** Tauri, Flutter, Firebase, Git, GitHub, Vercel, Netlify, Postman, Telegram Bot API
- **Design Tools:** Figma, Wireframing, High-Fidelity Prototyping, Component-Driven Design, User Experience Design (UED), Notion
- **Competencies:** Rapid Prototyping, AI-Assisted Development, Cross-Functional Collaboration, Technical Leadership, Responsive Web Design
- **Certifications:** NPTEL Elite Grade – The Joy of Computing using Python (70%+) | [Certificate](#)
